### Sleeper Fish House Checklist

If you're one of those fisherman that never wants to leave the ice, you're in luck at Rocky Point -- we offer sleeper fish houses! We tell guests to prepare like you're going on a camping trip. Some folks like to go big and others keep it simple.

The houses have propane heat and gas lights, stoves with ovens, a private toilet area, covered mattresses, a small table and four chairs.

The sleeper fish house package includes:

- Transportation to/from your house
- Live bait -- we provide fat head chubs as part of the fishing package
- Water for cooking, cleaning, dish washing
- Garbage bags
- Toilet paper

Things to bring on your sleeper house adventure:

- Fishing Gear: Rods, tackle, jigs, extra line, flashers
- Bedding: Pillow and sleeping bag
- Cooking Supplies: Pots and pans, filet knife, utensils, paper towels, paper plates
- Food and beverage
- Cards/Games
- Battery Powered Radio
- Gas Powered Generator
- Small Grill

Clothing

- The fish house tends to heat up quickly, so make sure to layer your clothing. The top bunks tend to be warmer than the lower bunks at night. Also, be sure to bring warm boots, hat and mittens if you plan on fishing outside.

Showers

- We have shower facilities on shore for our sleeper fish house guests. Please arrange a time with your driver to come back to shore.

# Rules & Regulations for Ice Fishing Lake of the Woods Provided by the DNR

(Excluding Four Mile Bay and the Rainy River)

## **Lines**

No more than two lines may be used by any one angler, this includes the use of tip-ups. No angler may leave their line(s) unattended (if you leave your shelter, ensure your lines are out of the water).

## **Limits and Size Restrictions (dressed sauger count as walleye)**

Walleye/Sauger:

From December 1 to April 14, the daily and possession limits are as follows: six in the aggregate, no more than 4 may be walleye and not more than one walleye over 28.0 inches. (examples: 5 sauger / 1 walleye --- 4 sauger / 2 walleye --- 3 sauger / 3 walleye). All walleye in possession must be less than 19.5 inches in length or greater than 28.0 inches in length. All walleye that are 19.5 to 28.0 inches in length, inclusive, must be immediately returned to the water.

Northern Pike:

All northern pike in possession must be less than 30 inches or greater than 40 inches in length. All northern pike that are 30 to 40 inches in length, inclusive, must be immediately returned to the water. A person's daily and possession limit for northern pike is three, and must not include more than one northern pike over 40 inches in length.

## **Kept Fish**

All fish kept must be countable, walleye and northern pike must be measurable. Do not freeze fish into a clump or a bucket of water.

## **Possession of Fillets**

Filleting of fish is only allowed on the lake when in immediate preparation of a meal (fish may not be filleted on the lake for transport). Immediate preparation of a meal means that you are in the process of preparing a meal that is to be cooked and consumed shortly thereafter (i.e. oil is hot in the pan). Unconsumed cooked fillets will count towards your daily and possession limit. Carcasses of fish that were filleted for a meal on the lake must be maintained for the duration of the day and in such a way that they are measurable and countable. These carcasses are part of your daily and possession limit. Carcasses may be disposed of the following day, allowing you to replenish your limit.

## **Littering**

Do not leave any trash behind, do not dispose of fish carcasses on the ice and do not leave unwanted fish on the ice.
